Machine Readable Files

A machine-readable file is defined as a digital representation of data or information in a file that can be imported or read by a computer system for further processing without human intervention, while ensuring no semantic meaning is lost. These files are in the CMS defined format (JSON) and are not meant for a member-friendly search of rates, benefits, or cost sharing. Members should log in to www.anthem.com/ca for this information.

The table of contents is an approved CMS schema approach that combines the in-network rate files and references the locations (URLs) from which the appropriate files can be downloaded. To view a list of all machine readable files and associated urls published, click the Table of Contents link below and follow the prompts.

Find Files for an Organization

To view machine readable files for an specific employer group, an EIN search can be performed. Upon entry of a EIN, the machine readable file links for the pricing for that employer will be displayed.

9-digit EIN

Search

Please note that when an EIN is entered, multiple links will be displayed including:

- Links to applicable In-Network Negotiated Rate
- Links to Out-of-Network Allowed Amounts File
- Links to Out-of-Area Rate Files (rates applicable when a member uses a provider in a non-Anthem state.)
